## PREFACE

Social phenomenon is a series of social events that arise from observation and experience and form the basis of thought and research. Sports is a global social phenomenon. From the past to the present era, sport have been used as a platform to achieve social goals and also to resolve social issues. The sports provide a wide range of activities for children to old age people ranging from competitive, recreational, adventure, defensive etc. The impact of the sports is reflected in the cultural and political aspects of almost all societies.

The increasing trend of research in the field of physical education and sports has increased the demand for literature related to research work. Keeping this fact in mind, various research papers are being published in the form of books to guide the researchers who are engaged in research work and start research work. The book presented is a compilation of research papers related to the subject of Physical Education and Sports Sociology.

As part of this endeavor in the field of publishing, we have compiled research papers written by scholars, researchers and presented in book form. We have full hope and belief that the research papers written by the scholars in this book will be very useful for the teachers, researchers and the students.

We express our sincere gratitude to the **Social Research Foundation** for publishing the book in a very short span of time with elegant and artistic printing. We also express our indebtedness to **Dr. Rajeev Mishra**, Secretary of the Social Research Foundation and all his team to provide us the opportunity to present this book.

-Dr. Shri Krishna Patel
