Preface

The new education policy is laid down with several initiatives that are really the need of the present scenario. The National Education Policy (NEP) was approved by the Union Cabinet of India on July 28th, 2020. New education policy is formulated by the government of India aiming towards achieving the policy initiatives by 2030. It is a complete change in the existing education policy which was last implemented in 1986. The policy is concerned with attention on skill development along with the new study curriculum and structure. The change has to be done in the existing education system in order to make education reach up to all, ranging from urban to rural areas. It will be towards meeting sustainability by fulfilling Goal 4- Quality Education. The main motive is making a child learn along with becoming a skilled one, in whatever field they are interested. The learners are to be provided with integrated learning i.e., having the knowledge of every discipline. The same is applicable in higher education too. The new education policy also lays emphasis on the reformation of teacher's education and training processes.

The book entitled “**An Analysis of New Education System**” is a compilation of 11 chapters, which includes articles, research and conceptual papers from various

academicians, corporate professionals, research scholars and students. The broad theme of the book is convincingly appropriate in the midst of multiple opinions and commentaries about New Education Policy (NEP) to analyse the policy from the lens of authors.

The book is devoted to examining some key dimensions of New Education System. It throws light on various aspects like National Education Policy 2020 Special Impact: Higher Education, राष्ट्रीय शिक्षा नीति 2020 में बालिका (स्त्री) शिक्षा का प्रावधान, Right to Free and Compulsory Education and It's Analysis with NEP, The Vision of New Education Policy : Its Influence in Higher Education, New Education Policy 2020, Online Education, National Education Policy 2020 , Role of Higher Education In Socio-economic Development of India , New Education Policy: A New Dimension to Education System, Impact of New Education Policy 2020 on Teacher Education, which reflects logical flow of content and clear in its writing style, rich in real-world examples. We feel that the overall development of an individual needs a holistic approach in which “Education” is one very important and prime ingredient. This book opens an enchanting window on how these changing paradigms affect dynamics of Education System. This intriguing work takes an original perspective on educational issues, combining elements

of present status, past and future avenues in overcoming education management challenges ahead, particularly in India.

We extend our warm greetings to all the authors for their sincere efforts and endeavors. We owe a great deal of expertise and experience of our family and everyone, whose support, interest and commitment has been instrumental in successful compilation of this edited book. We express our sincere thanks to Social Research Foundation, Kanpur, U.P. (India) publishing this book.

We hope you will enjoy reading thought provoking articles, papers & chapters and find them useful as an important source of information for making relevant decision.
