Editorial ...

According to UNESCO education is the basis for sustainable development. Sustainable development has become an important issue on international, national and region agenda concerning education policy over the past few years. Articulating the goals of Higher Education, Radha Krishnan Commission on University Education 1948-49 put it in following words, "The most important and urgent reform needed in higher education is to transform it, to endeavour to relate it to the life, needs and aspirations of the people and there by make it the powerful instrument of social, economic and cultural transformation necessary for the realization of the national goals." For the purpose, education should be developed so as to increase productivity, achieve social and national integration, accelerate the process of modernization and cultivate social moral and spiritual values. Unfortunately, for the entire program made even 70 years after Indian' independence, higher education faces challenges in the critical areas of quality and quantity. Main challenge is huge demand-supply gap, not just interms of seats available but more so interms of seats available in institutions who offer quality education. We have to think seriously over it.

I feel great pleasure to present our International Journal "Remarking An Analisation". Like the previous edition this issue also contains good research papers on various areas of research. "Remarking An Analisation" invites original contribution in various branches of social science, science, engineering, management and other.

I am thankful to the members of the editorial Board and Advisory Board for their constant cooperation and guidance. My Sincere thanks are also due to authors of various research papers. I hope that in future also the author will continue their support in sending valuable research papers for this journal so that people at large may get new things in the modern era.

Guidelines for Reviewers

Please, carefully read the information below, it may help you to review a research paper:-

- **Carefully review the paper**
- Your review should not be about what should have been done; rather it should be a critique of **what the author actually did**.
- If you think paper is poorly written or the contribution is poorly described, **state that, instead of rejecting the paper on this basis, give your comments/ suggestions for modification**.
- Don't review a research paper under the **time pressure**. Spare a little of your **valuable time to review** a paper properly.
- **Review to accept papers**
- When you read a paper, try to **find reasons to accept the paper**, you should spot what is good about the paper and highlight that in your review.
- If you don't like the approaches, fine, but try to decide what about the author's paper makes it acceptable for publication, No doubt, all the papers are not worth publishing, but **almost all papers have an idea** THAT the author is promoting and **you should review to accept that idea**.

- Sometimes, the idea is bad/wrong/ already been done and so paper can't be accepted. But read the paper looking for **a reason to accept** it.
- When you write your review, write with the mind set **"how to improve this paper"**.
- **Write a Review**
- Review form has option "Yes or No". You should write comments after "yes or no" mark that help the authors to improve his paper. Following should all be covered somewhere in your review:
- Objective of the papers
- Highlight the contribution of the paper as well as how significant it is.
- State your recommendation and why
- State ways to improve the paper
- You should note the small things , but ideally place them at the end of your review in a separate section as "Details to improvement/ General Comments"
- 4. **Things to avoid**
- Do not say "The author should add additional references or write on such pattern" **without actually write examples for desired pattern**.
