## Guidelines for Reviewers

Please, carefully read the information below, it may help you to review a research paper:-

1. **Carefully review the paper**
2. Your review should not be about what should have been done; rather it should be a critique of **what the author actually did**.

4. Don't review a research paper under the **time pressure**. Spare a little of your **valuable time to review** a paper properly.
5. **Review to accept papers**
6. When you read a paper, try to **find reasons to accept the paper**, you should spot what is good about the paper and highlight that in your review.
7. If you don't like the approaches, fine, but try to decide what about the author's paper makes it acceptable for publication, No doubt, all the papers are not worth publishing, but **almost all papers have an idea** THAT the author is promoting and **you should review to accept that idea**.
8. Sometimes, the idea is bad/wrong/ already been done and so paper can't be accepted. But read the paper looking for **a reason to accept** it.
