

## *Editorial...*

### *Greetings!*

*Thanks a lot. This is how I can only express my gratitude to all those who have turned Asian Resonance (AR) as a true multi-disciplinary research journal in a quick span of time. Even a cursory glance at the list of contributions in this issue bears testimony to the fact that more and more subjects and topics of varied interests are on the rise with each new issue of the journal. This augurs well not only for the journal but for its stakeholders as well. Since independence, research has remained neglected in India. Barring few renowned universities and institutes, research activities did not find due attention. As a result, Teachers also stopped thinking research as a prerequisite to their career growth. It is indeed heartening to note that now the teaching fraternity has woken up from its slumber and exhibiting renewed interest towards research activities. A teacher needs to be a thinker. He or she needs to possess three crucial Ps- Pedagogical Knowledge, Professional Attributes and Personal Attributes. Inclination towards research truly makes a teacher professional, besides enhancing his or her academic performance index. Asian Resonance since its inception has been trying to cultivate a taste for research activities among the academicians. I really feel delighted that our efforts are getting encouraging response from the fellow academicians. I am sure that your continued support will make the journal an outstanding publication of global standards.*

*I look forward to receiving more contributions from your end in the form of quality research papers and wish you a Happy Reading.*

***Prof. (Dr.) M.A. Naqvi***
